"Empire" Expansion Back Ledger Outfits

Our "Empire" Ledger is intended to meet a growing demand for a very low priced ledger or petty account book. While the price of this ledger is low, it is by no means a poorly constructed and imperfect makeshift, as is too often the case in this class of binders. The mechanism is made of sheet steel throughout. The center post contains the locking device, operated by a key inserted into the top of the binder. Other posts contain strong spiral springs to expand the binder.

The binding of these ledgers is of the best grade consistent with the price, and while not as good as the higher grade ledgers, is guaranteed to outlast anything at the same price on the market.

These Outfits contain Regular Ledger Form Sheets and Plain Ruled Indexes.

If you want a high-grade loose leaf ledger, send for our special catalogue showing our MANHATTAN ledger. It represents the highest class of loose leaf construction and is made in sizes to cover all needs. Special ruled sheets to order for any business.

We handle everything in the way of loose leaf goods, price books, binders, etc., and are always glad to quote on regular or special sizes.

THE UNIMATIC MEMORANDUM BOOK

A perfectly flat opening, self indexing Loose Leaf Book, measuring only $\frac{3}{4}$ inches in thickness (outside measurement) and having rings $\frac{1}{4}$ inches in diameter. Will accomodate 50 sheets with index. Bound in flexible black imported Morocco and made small enough for the pocket of the vest, trousers or coat. Used extensively for price books, memorandum books, route books, engagement books, etc.

The rings in the Unimatic form a perfect circle when closed, and the sheets may be turned easily and freely, as in a bound book, yet these rings open simultaneously with a pull on the metal slide, permitting insertion or removal of sheets at any part.

Covers are made of flexible black imported Morocco, lined with leather and metal parts are of solid German silver, high polished; all sheets are gilt edged, making a very handsome memorandum book.

PERFECT OILER

This oiler consists of a tube for holding the oil, fitted at the top with our patent tip, which can be unscrewed to refill the oiler. A cap fits over the top to prevent the tip being bent or filled with dirt when carried in the pocket or among other tools. This tip throws only a few drops at a time, and prevents all spilling and waste of oil. The shape and nickle finish makes it the handsomest, neatest and most convenient oiler in use. The "Perfect" has won every test in competition with other oilers. Each 20c. Postpaid 25c

Eureka Sanitary Copying Cloth Bath

Is made—the pan of the best quality of galvanized iron, the cover of zinc to prevent rust or corrosion, and is filled—the pan partially, the cover entirely—with a ground stone composition, which will absorb and retain a large quantity of water without softening. The composition is impregnated with an antiseptic compound which prevents rancid and sour smells so common and objectionable in other copying baths.

Davis Automatic Inkstands

The "T" Adjustment is the latest improved feature of the Davis Automatic Inkstand. It consists of an inverted "T" tube, the stem of which telescopes within the tube of the plunger at its lower end. It operates to adjust the plunger to any height to which it is raised, instantly, without any further manipulation, and is one of the greatest features yet added to the heretofore supposedly-perfect Davis Automatic Inkstand.

The Sengbusch Self-Closing Inkstand

The newest thing in Automatic Inkstands. Opens at the touch of a pen. Closes automatically. No dip end or valve movement to spurt ink upon accidental contact. Round pressed glass, 3 inches in diameter at base, 2 1/4 inches high, vulcanized rubber top.

CAPITOL INK STANDS

No. 2. Pressed glass and hard rubber
 funnel.....\$.50

"The Capitol" is a large, handsome ink-stand for home or office desk, constructed on scientific principles—a broad, flat base to give stability and a graceful dome-shaped reservoir to hold the supply for several months. Black or red funnel. Black sent unless red is ordered.

Protected both from air and dust, the ink can neither evaporate nor clog, and is always rendered clear and fluid until the last drop is used from the small concave depression under funnel.

Depressing of the funnel is avoided, the right amount of ink being fed without loss of time or injury to pen.
